

Safe, Smart and Healthy – Keys to Success in Your New Home
Personal Hygiene - 7

ENGLISH

Mrs. Li was notified by her daughter's school that the children had been exposed to head lice, an insect that buries itself in the scalp. She had to check her daughter's head and scalp for lice and then follow specific instructions to get rid of the lice.

Her daughter needed a medicated shampoo to kill the lice in her hair and scalp, and they then needed to wash all the bedding and clothes in the house with hot water.

Stuffed animals that cannot be washed must be put inside a sealed plastic bag for two weeks, to kill any eggs that the lice may have left inside.
